Section 1 - Vision, Mission Statement & Values

Strategic Vision: To be the UK's most successful crowd management and event security company.

Mission Statement: To deliver excellence in crowd management and security

Company Values: Embrace change, create opportunity, and develop trust

Showsec defines quality as;

“Meeting or exceeding the requirements of our customers”

Showsec strives to be the best provider of security services in the industry. Using these guiding principles, everyone in Showsec is accountable for fully satisfying our customers by meeting or exceeding their needs and expectations with best-practice solutions and services. Our goal is 100% customer satisfaction 100% of the time

Section 2 Objectives

Showsec's quality objectives are:

Compliance

- Create and maintain a company-wide library of Policies & Procedures (SOP's) on SharePoint
- Ensure full compliance to writing/storing and utilisation of policies on SharePoint. Line managers to arrange programme of drafting where necessary, to ensure the quality of content, and to take responsibility for disseminating content to their team.
- All employees are to comply with the policies and procedures laid out by the department and the Company. To be enforced by line management.
- Develop, publish, and regularly maintain a risk map for the business. This should be used as the basis to promote a compliance culture within each department
- Give compliance a clear identity and defined responsibility.

Key performance Indicator: -

- Risk map updates to be completed by each department quarterly and reported to H&S manager who will compile overall report to the board.

Ongoing bench marking and improvement to the company product

- Instigate a client survey in 2023 combined with regular analysed service audits to benchmark satisfaction of clients in order to capture and meet their evolving service needs.
- Undertake a casual staff survey to understand the sentiment of the workforce and identify areas for improvement.

- Greater focus on reputational PR in line with benchmarking in 3.5 (a)
- Focused delivery of the customer service policy by ensuring that all customer (public) communications/ requests/ complaints are dealt with quickly, efficiently and in line with updated policy
- Analyse the need to refresh operational delivery in line with market requirements capturing skill sets, training and uniform standards

Key Performance Indicators

- Completion and analysis of client survey by June (results to be published across business)
- Revise service audit and introduce quarterly trends analysis, reported to board by RM team to identify product development needs. To include uniform standards, stock management and compliance with staff accreditation process
- Achieve requirements of customer service policy by responding to complaints to the required standard within the requisite and published timeline. To be monitored quarterly.

Section 3 Scope

Showsec excels in delivering event security services, prioritising customer satisfaction through experience, training, and industry-leading standards. We challenge norms, collaborate with industry bodies, and boast expertise in various areas like consultancy, crowd management, and event security. Showsec is an 'Investor in People,' supporting research, training, and delivering flexible, professional services. Our Quality Manual ensures customer, client, and interested party satisfaction. Showsec is dedicated to meeting ISO9001:2015 requirements and continuous management system improvement.

Customer Focus

Showsec Managers demonstrate leadership and commitment concerning customer focus by ensuring that:

- Customer/clients and applicable statutory and regulatory requirements are determined, understood, and consistently met.
- The risks and opportunities that can affect conformity of products and services and the ability to enhance customer satisfaction are determined and addressed; and
- The focus on enhancing customer satisfaction is maintained, by using the results of the analysis and evaluation of customer satisfaction data. As a result of this analysis, Showsec management might direct a change in the client-related processes and the operation of the business, including the allocation of resources.

Continuous Improvement

Showsec continually improves the suitability, adequacy, and effectiveness of the quality management system.

Showsec considers the results of analysis and evaluations, and the outputs from the management review, to determine if some needs or opportunities are addressed as part of the continual improvement.

Monitoring and Measuring Resources

Showsec determines and provides the resources needed to ensure valid and reliable results when monitoring is used to verify the conformity of products and services to requirements.

Showsec completes a series of audits/questionnaires including

- SIA Compliance Audit
- Internal Audits
- Process audits
- Venue Audits
- British Standard Audits
- Operational Compliance checklist
- Client service delivery audits
- Area Manager Compliance Checklist
- Regional Manager compliance checklist
- Client and staff surveys

All the above checklists, audits and surveys are available on JotForm or ISO9001 SharePoint Folders and Freshdesk

Competence

Competence in our personnel is determined by their education, training, experience, and knowledge. We've established a competency framework for Stewards, SIA, Supervisors, and Heads of security through our training department. Operational Managers, support managers, and support staff demonstrate their competency through CVs, interviews, and relevant formal qualifications.

HR has developed a competency framework for employees with succession plans in place. If someone falls short of the required competency levels, Showsec offers mentoring and additional training to ensure they can effectively perform their job.

We assess the effectiveness of these actions through direct observation and knowledge testing, as detailed in the SIA Compliance audit on the compliance tracker. Qualifications, both internal and external, are recorded in the qualifications tab on smartg8.

Organizational Roles, Responsibilities, and Authorities

Showsec management has established specific responsibilities and authorities for the roles and ensures that the management teams understand and are aware of their responsibilities

Owners can make decisions and effect change to the area and/or processes to which they have been assigned. Although authority is delegated, the overall responsibility and accountability for the quality management system remain with the Co-CEO namely Mark Logan.

The Co-CEO assigns the responsibility and authority for:

- Ensuring that the quality management system conforms to the requirements of ISO9001:2015 Standard for specific roles, such as internal auditors and management review
- Ensuring that the processes are delivering their intended outputs, this has been assigned to department managers, and the operational teams
- The Health, Safety, and Compliance Manager is responsible for coordinating the reporting with the department managers and operational teams responsible for reporting on specific processes
- The operational and marketing teams are responsible for client focus ensuring that any issues are resolved; and
- The Health, Safety, and Compliance Manager is responsible for ensuring that the integrity of the quality management system is maintained when changes to the

quality management system are planned and implemented, with input from the team applying the changes

Actions to Address Risks and Opportunities

When planning for the quality management system, and processes, Showsec determines its risks and opportunities and plans actions to address them. This is contained within the Business Plan and thereafter in department plans

Its purpose is to prevent nonconformities, including nonconforming outputs, and to determine opportunities that might enhance customer satisfaction or achieve Showsec's quality objectives

When examining Showsec's opportunities, we first determined and assessed the potential risks to the quality management system associated with them; the results have been used when making the decisions on whether to implement them

Showsec has focused on:

- giving confidence that the quality management system can achieve its intended result(s);
- enhancing desirable effects, and the creation of new possibilities (by improving the efficiency of its activities, developing, or applying new technologies, etc.);
- preventing or reducing undesired effects (through risk reduction or preventive actions);
- achieving improvement to ensure product and service conformity and enhancing client satisfaction.

Showsec plans actions to address its risks and opportunities, implement the actions, and analyse the effectiveness of actions taken

The actions that Showsec will consider are (not limited to):

- avoiding the risk, by no longer performing the process where the risk can be encountered;
- eliminating the risk
- taking no action, where Showsec accepts the risk, based on its potential effect or the cost of the needed action.

Communication

Showsec ensures that the quality policy is clearly understood throughout the business. This is achieved by considering the requirements for awareness and communication by persons at different levels within the business.

The quality policy is communicated on the Head Office noticeboards, on the company intranet on the staff portal

Showsec ensures clear communication to an external provider, in the way of policies and procedures and briefing sheets

The staff newsletter also promotes awareness

Training

Showsec has established, implemented, and maintains a design and development process that applies to new modules and training packages, the Showsec App, and the Operations plan

Resources

Showsec determines and provides the resources needed for the establishment, implementation, maintenance, and continual improvement of the quality management system.

Showsec considers:

- The capabilities of, and constraints on, existing internal resources; and
- What needs to be obtained from the external providers.

People

Showsec determines and provides the persons necessary for the effective implementation of its quality management system and the operation and control of its processes. Consideration has been given to work the load and competence of relevant persons to carry out functions and roles in the quality management system (e.g. operational activities, audits, inspection, testing, complaint investigations).

Infrastructure

Infrastructure can have a critical effect on achieving conformity of products and services.

Showsec has:

- determined the necessary infrastructure for the effective operation of its processes and to achieve its intended results; for example, Provision of Head Office, IT systems, PPE, radios for communications, Showsec Intranet, transportation for members of staff, and JotForm platform
- provided and maintained the necessary infrastructure.

In determining the necessary infrastructure, Showsec has considered what facilities, equipment, computer software, services, etc, are needed to provide conforming products and services.

Measurement and analytics

Showsec ensures that the company conducts monitoring, measurement, analysis, and evaluation to enable the company to determine if the intended results are being achieved

ISO9001 requires the business to determine what needs to be monitored and measured and the methods used to analysis and evaluate the performance and effectiveness of the quality management system

Showsec analyses and evaluates appropriate data and information arising from monitoring and measurement.

The results of the analysis are used to evaluate:

- Conformity of products and services.
- The degree of customer satisfaction.
- The performance and effectiveness of the quality management system.
- If planning has been implemented effectively.
- The effectiveness of actions taken to address risks and opportunities.
- The performance of external providers, and
- The need for improvements to the quality management system.

Planning of changes

Change planning aims to preserve the quality management system's integrity and Showsec's ability to provide compliant products and services. We've explored strategies to mitigate negative impacts, such as conducting trials or contingency plans if the change isn't successful.

Changes in the quality management system can arise from various sources, including management reviews, audit findings, nonconformity assessments, complaints, process performance evaluations, shifts in context, or evolving client and stakeholder requirements.

These changes can stem from factors like process improvements to address non-conformities and the adoption of new information and communication technology (ICT) for services or processes.

Version Control

Showsec controls the documented documentation by ensuring that information is kept up to date, policies, procedures, and templates are version-controlled and are stored on SharePoint

Policies and Procedures are regularly reviewed and updated

Leadership

The directorate demonstrates leadership and commitment by taking an active role in engaging, promoting, ensuring, communicating, and monitoring the performance and effectiveness of the quality management system
